2	Body	PP
3	Ball	TPO
4	Ring	PP
5	Valve	TPO

H PUMP® Hygienic pump KPH01

The Product and its use

- H-PUMP® is an innovative airless dispenser that integrates the new Twin-flex valve (0.5g) technology
- Dosing of liquid products, in solution or in emulsion
- Compatible with alcoholic compounds
- Adaptable to deformable bags or bottles (28/410 necks)
- Can be used with our DELTA dispenser (KZD01)

Operating temperature

- The maximum temperature of use is 40°C

Doses

- Version KZPH01-V2
1.5ml to 2ml depending on the product to be dispensed
- Version KZPH01-V3
2ml to 3ml depending on the product to be dispensed

Advantages

- Mono-material and waterproof
- Lightweight without metal spring, it contributes to the reduction of waste
- Protection of the formula against oxidation and bacteria
- Excellent durability to withstand over 3000 cycles
- Few components only 5 parts
- Can be fitted with an operculum
