

# Hélium®

Protects your formula  
and our planet

Helium® is a compact and lightweight airless dispenser  
for hygiene and cosmetic products

Helium® is the combination of a flexible bag and an  
innovative pump

Its hermetic non-return valve protects your formulas

# The lightest and most protective airless technology on the market

A totally recyclable packaging with a PP bag  
Ultra-light pack incorporating a mono-material polypropylene (PP) pump

## A concentration of innovation and simplicity

- New patented airless technology (5 patents)
- Protects the formula thanks to its hermetic valve
- Clean outlet with the valve placed at the outlet
- Convenient flip-top cap
- Few components
- Precise control of the dispensing (up to 1.3ml)
- High viscosity range
- Simplified filling with its unique spout

Available in standard protective version V0 and in ultra protective version V1 with a specific priming step

## Two gestures

Drop in the palm of the hand for liquid products such as hydroalcoholic gel

Dosing with controlled precision for viscous creams and solutions for viscous creams

## Operation of the Twin-flex valve

Twin Flex valve

Distribution

**KARZA**<sup>®</sup>  
www.karza.eu

## Easy filling

Thanks to its unique spout, Helium is positioned and filled easily

- One or two 5mm nozzles allow the filling
- Small or large series
- Snap-on flip-top cap

## Possible bag sizes and capacities

Pouch Size	Volume (ml)*
80 x 80 mm	36 ml
80 x 100 mm	56 ml
80 x 120 mm	80 ml
100 x 120 mm	135 ml
100 x 140 mm	155 ml
100 x 160 mm	210 ml
